Our Program

The One2One@VC program offers each student at Varsity College with the opportunity to be issued with their own personal device. Continuing on from the successful expansion of the One2One Program in 2012 to all students in Year's 7-12, students starting in Year 4 in 2016 will be issued with a new device early in Term 1 (2016). This device can be used both at school and at home and **offers parents a convenient and simple solution to their child's IT needs.**

Students in the One2One program benefit from Varsity College's ability to take advantage of the enormous buying power of the Queensland Government. Varsity College is able to purchase high performance commercial-grade computers that are designed to survive the rigours of school environments while remaining well below the retail cost of the same or similar devices.*

Varsity College is asking that parents continue to lend their support to this very valuable and innovative program. Strong support from parents is paramount to the program's success.

only school owned, purchased and imaged devices are permitted to connect to Education Queensland's network.

Dell Latitude 3160

Hardware Specifications^

- Touch Screen Digitizer
- Latest Generation Intel Pentium Processor
- 11.6" HD Screen
- 500GB Hard Drive (HDD)
- Extended Battery Life (approx. 8-12 hours)
- Bluetooth, Wi-Fi, USB3, SD Card Access, HDMI
- Specifically built for the education environment (Spill-proof, Scratch-resistant, rugged design)

^*Specifications subject to change*

Software Features

- Windows 8.1 (Upgrade to Windows 10 when available)
- Office 2013 (free access to Office365)
- Symantec Antivirus (updated daily)
- Access to online software subscriptions such as Mathletics, Reading Eggs and Literacy Planet
- Access to Microsoft Windows App Store

Digital Platform

Education Software Subscriptions

Mathletics
Mathletics is a fun, supportive and effective tool for students of all ages and abilities, helping them achieve better numeracy results in all year levels.

Literacy Planet
Designed by educators, Literacy Planet improves spelling, reading, comprehension and grammar with over 15,000 literacy games aligned to the Australian Curriculum.

Reading Eggs
Reading Eggs makes learning to read interesting and engaging for students with great online reading games and activities.

Bring Your Own Device (BYOD)

Varsity College **does not** support students bringing their own device to school. The One2One Program ensures that all students have personal access to a high quality device that is fully capable of assisting with the delivery of quality educational programs. With school-provided devices, teachers can rely on technology being equal amongst students, equipped with the latest relevant software, connected to all school resources, connected to the internet, supported onsite and repaired in a timely manner. We offer parents peace of mind and take on the responsibility of sourcing and maintaining their child's device for them.

Varsity College devices come complete with a comprehensive **three year warranty**, accidental damage protection insurance and anti-theft protection as well as a wide range of educational apps and software. These features provide students with a reliable and secure device, giving parents confidence in providing their child with his/her own computer.

Varsity College devices connect to the Education Queensland network giving students access to a wide range of online resources and tools for learning.

By participating in the Student Resource Scheme (SRS), students receive a laptop, friendly service, a high level of security and software from the One2One@VC program for no additional charge.

Students who have participated in the Varsity College One2One program for the full three year period may be offered the opportunity to buy out the college device for a small service and handling fee. At this time the devices will have all Education Queensland software removed, be unattached from the network, and be restored to their original factory state.

Protection for Three Years

All computers in the Varsity College One2One program are covered against component defects for three years. The devices are fixed onsite by certified engineers and parents incur **no parts or labour costs**.

As participants in One2One@VC, students have unlimited access to our onsite support desk. All hardware issues are logged with the vendor and software issues are resolved within 24 hours.

Accidental Damage Protection (ADP)

Accidents happen and ADP insures devices against day-to-day accidental damage. A small excess fee may apply in some cases.

Note: Any evidence of mistreatment of the college device is evaluated on a case by case basis. Parents are expected to bear all costs of returning the tablet back to working order if it is deemed the device has been mistreated.

Absolute Computrace Security

If a Varsity College One2One device is reported to the police as stolen, it is locked remotely and rendered useless to protect any sensitive data stored on the device.

Hardware and Software Repairs

One2One devices are supported with a 3-5 day turnaround once parts are ordered. Students will be issued with a loan device to minimise disruptions to learning. Devices can be reset to their original state within less than 24 hours in the case of software issues.
